

Keep your Varsity poms looking new with our simple

# POM CARE GUIDE

- Always grab the pom **by the handle**, not by the strands.  
Separate the strands from the handle to prevent constant "crunching" of the ribbon.
- To re-fluff poms, separate strands by pulling in opposite directions.
- To avoid a mildew smell, never store wet poms in a plastic bag. Hang wet poms to air dry.
- If poms get dirty, hand wash with mild soap and water and hang to air dry.  
**Do not use heat to dry poms.**
